

BAIDURYA BHATTACHARYA

Professor, Department of Civil Engineering
Associate Faculty, Center for Theoretical Studies
Indian Institute of Technology Kharagpur
Kharagpur, WB 721302, India

Homepage: www.facweb.iitkgp.ernet.in/~baidurya/
Email: baidurya@civil.iitkgp.ernet.in,
baidurya@udel.edu

Adjunct Professor, Civil & Environmental Engineering
University of Delaware, Newark, DE 19711, USA

AREAS OF EXPERTISE

- **Nanomechanics** – Role of defects and fluctuations; Elastic properties; Molecular dynamics algorithms; Structure-property optimization; Dissipation
- **Probabilistic mechanics** – Damage and fracture mechanics; Statistical modeling of random load/environmental processes; Structural reliability; Probability based design and acceptance criteria

EDUCATION

January 1997	Doctor of Philosophy in Civil Engineering <i>The Johns Hopkins University, Baltimore, MD, USA</i> <i>Dissertation: "A Damage Mechanics-Based Approach to Structural Deterioration and Reliability"</i>
May 1994	Master of Science in Engineering <i>The Johns Hopkins University, Baltimore, MD, USA</i>
May 1991	Bachelor of Technology (Hons.) in Civil Engineering <i>Indian Institute of Technology, Kharagpur, India</i>

EXPERIENCE

Indian Institute of Technology Kharagpur, India <i>Department of Civil Engineering</i> <i>Center for Theoretical Studies</i> <i>Civil Construction and Maintenance</i> <i>Alumni Affairs and International Relations</i>	Professor Associate Professor Assistant Professor Associate Faculty Chairman Associate Dean	December 2011 – present April 2007 – December 2011 February 2006 – April 2007 March 2016 – present October 2013 – Sept 2016 October 2016 - present
---	--	---

The Johns Hopkins University, Baltimore, MD, USA <i>Dept. of Civil Engineering</i>	Visiting Faculty Post-Doctoral Fellow	June 2012 – May 2013 January 1997 – March 1998
University of Delaware, Newark, DE, USA <i>Department of Civil and Environmental Engineering</i>	Adjunct Professor Assistant Professor Scientist	January 2010 – present July 2001 – February 2006 July 2000 – June 2001
Stanford University, Stanford, CA, USA <i>Department of Civil and Environmental Engineering</i>	Visiting Assistant Professor	August 2005 – December 2005
American Bureau of Shipping, Houston, TX, USA <i>Advanced Analysis Department</i>	Engineer	March 1988 – February 2000

RESEARCH CONTRIBUTIONS

<p>1. Non-equilibrium statistical mechanics and molecular dynamics algorithms: Created three new deterministic molecular dynamics thermostats and improved the ergodic characteristics of existing ones. One of these is the full phase space “PB thermostat” that for the first time uses all phase space variables to control temperature. This thermostat is found to be superior to existing methods in non-equilibrium scenarios. Also, proposed new algorithms for parallelizing MD codes.</p> <p>Work on heat transport in small scale systems has led to maximum relative entropy based estimation of density functions and a new steady state fluctuation theorem for estimating free energy that will help experimentalists obtain equilibrium thermodynamic properties much more efficiently. A novel heat pump mechanism has shown that refrigeration is possible without particle transport or work done on the medium.</p>
<p>2. Phononic origins of friction and thermophoresis: Investigated the role of phonon in thermal transport, friction and thermophoresis at the nanoscale and how interface geometries can be tuned to give rise to desirable friction properties in nanoscale devices. Working on CNT oscillators, found that frictional dissipation depends significantly on interface features such as contact area, commensurability and endcapping of the inner core. Other findings include how energy is transferred between the tubes, how individual phonons in the outer tube near the interface respond to the sliding inner CNT, and how longitudinal acoustic phonon mode can initiate sliding motion of the core. Also found the radial breathing and twisting acoustic modes are the enablers of ultra-low friction in CNT oscillators.</p>
<p>3. Continuum damage mechanics and stochastic CDM: Derived a set of coupled partial differential equations describing pre-localization damage growth in a deformable body based on the thermodynamics of irreversible material damage accumulation. Closed-form solutions for plastic, creep and fatigue damages, containing only known material parameters, were obtained under uniaxial conditions.</p> <p>Considering two sources of randomness that are independent of each other: spatial and temporal variations in the material microstructure, and randomness in the loading and external environment, and making use of the widely different time-scales between these two, a set of stochastic differential equations of damage growth were also derived.</p>

4. The role of atomic scale defects: Investigated the role of random defects and fluctuations at the nanoscale on the mechanical behaviour of crystalline as well as amorphous solids, the subject systems being carbon nanotubes (CNTs), ionic crystals, and functionalized CNTs in epoxy composites modeled with a combination of ab initio and molecular dynamics computations. Experimental work on synthesizing DNA-wrapped CNTs into FETs to be used as sensors of physical parameters such as relative humidity and heavy metals successfully demonstrated.

Fracture toughness of CNTs: the problem of unstable crack growth in CNTs at finite temperature was circumvented by computing the strain energy release rate through a series of displacement-controlled tensile loading of single walled carbon nanotubes (SWNTs) with pre-existing crack-like defects of various lengths. The critical strain energy release rate, G_c , was determined as a function of crack length for each tube at different temperatures. A significant dependence of G_c on crack length was observed, evoking the rising R curve behaviour of metals at the macroscale, and suggesting that lattice trapping effect plays the role of crack tip plasticity at the atomic scale.

Effect of randomness: Modeled Stone-Wales (SW) defects on CNT walls as a Matern hard core random field, and studied randomness in load deformation histories, rate dependence, elasticity and fracture properties of CNTs.

Size effects: Investigated the compliance and ultimate strength of the CNT as their length was increased keeping the SW occurrence rate constant. The compliance (bulk property) and the ultimate strength (extreme) were found to become asymptotically independent. By analyzing the tube strength as a sequence of dependent stationary process, the extremal index was found which is likely to play an important role when longer and longer CNTs are adopted for practical applications.

5. Structure property optimization: Combined molecular dynamics and genetic algorithms on the “inverse problem” for the design of new materials through structure property optimization in the presence of multiple conflicting objectives.

6. Safety of structural components: Applied knowledge of material degradation, stochastic simulations, system reliability, extremal processes and risk assessment into structural engineering problems that have resulted in improved load modelling, damage detection, system identification, seismic reliability, disaster mitigation and developing design guides for prestressed members, nuclear power plant shells, ships, offshore vessels and aging bridges. His work on massively parallel GPU-based matrix inversion has shown for the first time that the time complexity scales as n which has far-reaching implications on solution of large engineering problems including structural analysis.

PUBLICATION AND DISSEMINATION

| 2) Bhattacharya, B. Review of Carbon Materials and Nanotechnology, Anke Krueger Wiley, 2011, in <i>Materials and Manufacturing Processes</i> , Taylor and Francis, 27:580-81, 2012 |

FUNDED RESEARCH

Career-wise: 25 Projects (3 ongoing, 22 completed) valued at Rs 365 lakh + USD 617,000

4 under consideration valued at Rs 225 lakh

Role and Title of Project	Project Type	Duration	Value	Agency	Status
1. co-PI. "Design of structures using the performance based earthquake engineering framework"	Research	3 years	Rs 24 L	BRNS	Under review
2. PI, "A Bayesian belief network based tool for real-time decision making in the event of severe damage to urban infrastructure"	Research	3 years	Rs 98 L	MHRD	Under review
3. PI, "First principles based investigation to understand and predict gas turbine material behaviour at the atomic scale"	Research	3 years	Rs 50 L	DRDO	Under review
4. PI, "Developing Advanced Facility for Research in Reliability Engineering"	Research	4/2015 – 3-2019	Rs. 50 L	BARC	Sanctioned
5. PI, "Development of constitutive equations for CNT epoxy nanocomposites"	Research	4/2015 – 3/2017	Rs. 20 L	ISRO	Ongoing
6. Co-PI, "Force identification in existing structures"	Research	12/2012 – 11/2019	Rs 35 L	DST	Ongoing
7. PI, "An exploratory investigation on the effect of uncertainties in in-service inspection of safety and life prediction of PFBR components"	Research	1/2015 – 12/2017	Rs 28 L	IGCAR	Ongoing
8. PI, "Advanced Facility for Research in Reliability Engineering"	Research	4/2009 – 3-2014	Rs. 150 L	BARC	Completed
9. PI. "A molecular mechanics investigation of the mechanical properties of amine functionalized CNT in epoxy matrix"	Research	9/2010 – 8/2012	Rs 30 L	ASL, DRDO, Hyderabad	Completed
10. PI, "A multi-scale investigation of the strength & durability of carbon nanotube based nano-electrode arrays used as bio-sensors"	Research	2/2009 – 2/2012	Rs 20 L	DBT	Completed
11. Co-PI, "Optimized properties of galvanized steel Phase 2"	Consultancy	6/2010 – 5/2011	Rs 5 L	Tata Steel	Completed
12. PI, "Swaralipi: a system for scripting Tagore's musical notes and transcoding,"	Research	10/2008 – 12/2011	Rs 10 L	Soc. Natural Language Tech. Research	Completed
13. PI, "Multi-scale modeling to study the role of atomic scale defects in CNT-based nanocomposites"	Research	9/2007 – 12/2010	Rs. 20 L	DST	Completed
14. co-I, "Development of suitable probability density functions for characterization of wave speed measurements in concrete"	Consultancy	12/2009 – 11/2010	Rs 2 L	CMERI Durgapur	Completed
15. PI, "Development of Life Prediction Technologies for Aeroengine Components"	Research	10/2007 – 9/2010	Rs 10 L	DMRL, DRDO	Completed
16. PI, "Development of reliability based criteria for containment design."	Consultancy	8/2008 - 8/2010	Rs 10 L	BARC	Completed
17. PI, "Simulation studies of mechanical behaviour and failure of carbon nanotubes"	Research	12/2006 – 6/2009	Rs. 10 L	DRDO	Completed

18. PI, "Multiscale modeling of small scale interfacial phenomena in carbon nanotube reinforced composites."	Research	6/2006 – 5/2009	Rs. 3 L	IIT Kgp	Completed
19. Co-PI, "Optimized properties of galvanized steel"	Consultancy	8/2008 – 2/2009	Rs 5 L	Tata Steel	Completed
20. PI, "Software capabilities for reliability analysis of ship structures"	Consultancy	5/2007 – 4/2008	Rs 4 L	Indian Register of Shipping	Completed
21. Co-Investigator, "Application of Load Resistance Factor Rating Using Site Specific Data"	Research	7/1/00 – 6/30/02.	\$47,828	Delaware Dept. of Transportation	Completed
22. PI, "The role of Small-Scale Fluctuations in Material Behavior and Failure"	Research	7/02 – 6/03	\$29,006	University of Delaware Research Foundation	Completed
23. Co-Investigator, "Development of Delaware's First Smart Bridge"	Research	09/01/02 – 08/31/04.	\$78,306	Delaware Dept. of Transportation	Completed
24. PI, Dean's startup fund College of Engineering	Research	2001-2006.	\$200,000	University of Delaware	Completed
25. PI, "Cracking of Overhead Sign Structures and Their Repair Using Composite Fabric as a Wrap"	Research	09/01/02 – 08/31/03.	\$10,954	Delaware Dept. of Transportation,	Completed
26. Co-Investigator, "Research Experiences for Undergraduates in Bridge Engineering"	Research	2002 – 2005	\$80,525/year	NSF	Completed
27. Co-Investigator, "Stainless Clad Rebar and CFRP Rehab Evaluation for Bridge 1-119,	Research	09/01/02 – 08/31/04.	\$59,140	Delaware Dept. of Transportation	Completed
28. Co-PI "Development of State-Specific Truck Weights"	Research	7/2004 – 7/2006	\$54,000	Delaware Dept. of Transportation	Completed
29. Co-PI "Assessing the Fatigue Life of Delaware's Steel Bridges"	Research	7/2004 – 7/2006	\$58,000	Delaware Dept. of Transportation	Completed

TEACHING

1. Teaching post-graduate courses

- IIT Kharagpur (2006 – present)
 - *Applied Reliability Engineering*
 - *Probability based Design*
 - *Structural Reliability*
- Stanford University (2005)
 - *Probabilistic Models in Civil Engineering*
- University of Delaware (2000 – 2006)
 - *Probability Based Design* (including developing the course)
 - *Reliability of Engineering Systems* (including developing the course)
 - *Introduction to Emerging Methodologies for Engineering Analysis*
 - *Mechanical Behavior of Materials and Structures* (developed and taught jointly)
 -

2. Teaching under-graduate courses

- IIT Kharagpur (2006 – present)
 - *Solid Mechanics*
 - *Structural Analysis*
 - *Engineering Drawing and Graphics*
 - *Introduction to Civil Engineering and Materials*
- University of Delaware (2000 – 2006, 2016)
 - *Probability and Statistics for Engineers* (including developing the course)
 - *Solid Mechanics*
 - *Statics*

3. Teaching Assistant 1991 – 1996

- *The Johns Hopkins University, Baltimore, MD, USA*
 - TA in graduate courses: *Structural Reliability, Advanced Structural Analysis*
 - TA in undergraduate courses: *Steel Structures, Strength of Materials, Probability and Statistics, Engineering Graphics and Design*

4. Study Aids:

- 1) “Probability based Safety Assessment of Infrastructure Systems: Design, Maintenance and Safety Targets,” ISWT on Probabilistic Safety Assessment, IIT Kharagpur, December 2015. Available at http://www.gian.iitkgp.ac.in/files/brochures/BR1447068216PSA_Brochure_Goyal.pdf
- 2) “Structural Analysis,” Train 10 Thousand Teachers, National Mission on Education through ICT, IIT Kharagpur, September – October, 2015. Available at http://www.nmeict.iitkgp.ernet.in/video_link.php?id=11%20&&%20vtype=mp4
- 3) “Design philosophy,” Train 10 Thousand Teachers, National Mission on Education through ICT, IIT

Kharagpur, September – October, 2015. Available at
http://www.nmeict.iitkgp.ernet.in/video_link.php?id=11%20&&%20vtype=mp4

- 4) “Design code development ,” Train 10 Thousand Teachers, National Mission on Education through ICT, IIT Kharagpur, September – October, 2015. Available at
http://www.nmeict.iitkgp.ernet.in/video_link.php?id=11%20&&%20vtype=mp4
- 5) “Temperature control in molecular dynamics,” Pravartana. TEQIP Workshop on Mechanics and Applied Mathematics. July 2014. IIT Kanpur. Available at
http://www.iitk.ac.in/tkic/Pravartana14/Pravartan14_Videos.html

5. New courses proposed

At University of Delaware (2001 – 2005)

CIEG315 Probability and Statistics for Engineers (introductory course for 3rd year UG)

CIEG615 Probability based Design (intermediate course of 4th year UG and MS)

CIEG815 Reliability of Engineering Systems (advanced course for doctoral students)

MEEG667 Mechanical behaviour of materials and structures

At IIT Kharagpur (2006-2016)

CE60112 Risk and reliability analyses of civil infrastructure systems (for MTech students)

CE60103 Monte Carlo simulations in engineering (for MTech students)

CT70010 Nanomechanics (for doctoral students)

GIAN 151001B04: Nonequilibrium Statistical Mechanics and Molecular Dynamics (co-taught with international and national experts, for country wide participation as part of Global Initiative of Academic Networks)

SUPERVISION OF STUDENTS

• Doctoral students

- o *Degang Li*. Ph.D. 2004. University of Delaware (co-advised). Thesis: “Reliability-based Load and Resistance Factor Rating of Bridges using Site Specific Data.”
- o *Qiang Lu*. Ph.D. 2005. University of Delaware. Thesis: “Influence of randomly occurring defects on mechanical behavior of carbon nanotubes”
- o *Suhas Vhanmane*, Ph.D. 2011. IIT Kharagpur. Thesis: “Probabilistic modeling of ultimate strength of ship structures under random initial imperfections and corrosion loss”
- o *Ambarish Paul*. Ph.D. 2015. IIT Kharagpur (co-advised). Thesis: Solution processed and micro-patterned DNA functionalized carbon nanotube network as chemical sensors.
- o *MVD Prasad*, Ph.D. 2016. IIT Kharagpur. Thesis: Phonostating and energy dissipation in CNT oscillators.
- o *Puneet Patra*. Ph.D. Thesis: Identifying Temperature and Related Statistics for Nonequilibrium Steady States. Thesis submitted.
- o *Subhamoy Sen*. Ph.D. 2016. Thesis: Control theory based structural health monitoring using ambient vibration response.

- **Masters students guidance: about 30**
- **Undergraduate interns/advises: about 40**

INVITED TALKS

- 1) "Probability based Safety Assessment of Infrastructure Systems: Design, Maintenance and Safety Targets," *ISWT on Probabilistic Safety Assessment*, IIT Kharagpur, December 2015
- 2) "Phonon scattering dynamics of friction and thermophoretic motion in carbon nanotube oscillators," *Mathematics, mechanics and physics for tomorrow's materials*, International Centre for Mathematical Sciences, Edinburgh, October 2015
- 3) "Uncertainty in structural engineering," *2nd SRESA National Conference on Reliability and Safety Engineering*, Anna University, Chennai, October 2015
- 4) "Probability based design philosophy," *Train 10 Thousand Teachers, National Mission on Education through ICT*, IIT Kharagpur, September 2015
- 5) "Calibration of probability based design codes," *Train 10 Thousand Teachers, National Mission on Education through ICT*, IIT Kharagpur, September 2015
- 6) "Probability based design and assessment of civil infrastructure systems," SERC-CSIR, Chennai, August 2015
- 7) "Molecular dynamics simulation of thermal transport in carbon nanotubes," Annual Technical Meeting of NMD-ATM, College of Engineering Pune, Pune, Nov. 2014
- 8) "Temperature control in molecular dynamic simulations," *Pravartana*, IIT Kanpur, July 2014
- 9) "Risk and reliability issues in infrastructure management," *Indo Canadian Workshop on Sustainable Infrastructure Management Practices*, New Delhi, February 2014
- 10) "Treatment of uncertainty in structural engineering problems," *SERB-DST Brain Storming Workshop on Research in Structural Engineering*, Department of Civil Engineering, IISc, Bangalore, January 2014.
- 11) "Mechanical Properties of CNTs and CNT Nanocomposites Through Ab Initio and Atomistic Simulations," Dept. of Civil Engineering, Johns Hopkins University, Baltimore, MD, October 2012
- 12) "Strength and reliability assessment of structural components and systems," Boeing R&D Center, Bangalore, May 2012.
- 13) "Reliability assessment of structural components and systems," *Symposium on Fatigue Fracture and Integrity Assessment*, NML-Tata Steel, Jamshedpur, May 2012.
- 14) "Mechanical properties of CNTs and CNT epoxy interfaces through simulation studies," *Center for Development of Advanced Computing*, Govt. of India, Pune, April 2012.
- 15) "Challenges in disaster mitigation of large infrastructure by engineering design," *Indo American Frontiers of Engineering Symposium*, National Academy of Engineering, Washington, DC, March 2012
- 16) "Molecular dynamics simulation of fracture of carbon nanotubes," *Emerging Trends in Carbon nanotubes*, IIT Kanpur, November 2011
- 17) "Extreme Value Statistics for the Very Small and the Rather Large in Engineering Problems," Virginia Commonwealth University, Richmond, VA, July 2011

- 18) "Atomistic Simulations of Fracture," Institute of Mathematical Sciences, Chennai, February 2011.
- 19) "Atomistic Modeling of Fracture," University of Ljubljana, Slovenia, January 2011.
- 20) "Nanomechanics," Workshop on Materials Modelling and Simulation," University of Hyderabad, December 2010.
- 21) "Infrastructure Systems Reliability Involving non-Structural Components," *IUSSTF-NSF Indo-US Workshop on Innovative Materials & Structural Systems for Resilient & Sustainable Built Infrastructure*, IIT Bombay, Dec 2009
- 22) "Probability theory and Bayesian inference," *A short term course on logic and applications of logic*, IIT Kharagpur, December 2009
- 23) "Probability concepts," *Statistics & Pattern Recognition for Automated Diagnostics*, IIT Kharagpur October 2009
- 24) "Introduction to Partial Safety Factor in Engg. Design," *5th Indo-German Theme Meeting on 'Structural Integrity of Pressure Retaining Components'*, BARC and Jadavpur University, February, 2009
- 25) "Molecular dynamics simulation of fracture: a look at carbon nanotubes," *Indo US workshop on Materials Design: Measurement Modeling and Informatics*, Bengal Engineering and Science University, January 2009
- 26) "Molecular dynamics simulation of solids: a case study on carbon nanotubes," *AICTE/MHRD sponsored winter school on Nanoparticle-Science and Technology*, National Institute of Technology, Durgapur, Jan 2009
- 27) "Bending Behaviour of Carbon Nanotubes," Plenary Lecture, International Conference on Materials Discovery the *University of Tlemcen*, Oran, Algeria October 11 – 13, 2008.
- 28) "Probabilistic Background to FEMA Criteria for Steel Moment Frames," *A short term course on Seismic Reliability and Life Assessment of Structures*, National Programme on Earthquake Engineering Education (NPEEE), IIT Kharagpur, March 2007.
- 29) "Monte-Carlo Simulations in Engineering," *A short term course on Seismic Reliability and Life Assessment of Structures*, National Programme on Earthquake Engineering Education (NPEEE), IIT Kharagpur, March 2007
- 30) "Fracture and Fracture resistance of carbon nanotubes," *Workshop on Mechanical Behaviour of Systems at Small Length Scales -2*, IISc, Bangalore, February 2007.
- 31) "Monte Carlo Simulations in Engineering," *Soft Computing Tools in Civil Engineering*, IIT Kharagpur, November 2006
- 32) "Tensile properties and fracture resistance of single-walled carbon nanotubes through atomistic simulation," *Defence Materials Research Laboratory*, Hyderabad, May 2006
- 33) "Analysis of Randomness in Mechanical Properties of Carbon Nanotubes through Atomistic Simulation," *Indira Gandhi Center for Atomic Research*, Kalpakkam, May 2006
- 34) "Reliability of Redundant Ductile Structures with Uncertain System Failure Criteria," *Bhabha Atomic Research Center*, Mumbai, India, March 2006.
- 35) "Application of extreme value theory in civil engineering," *University of Ljubljana*, Slovenia, June 2005
- 36) "Issues in structural systems reliability," *Bhabha Atomic Research Center*, Mumbai, India, January 2005

- 37) "Atomistic Simulations of Fracture : A Review", *Indian Institute of Technology*, Kanpur, January 2003
- 38) "Reliability-Based Design: How to Use a Deterministic Finite Element Code in a Probabilistic World" *American Bureau of Shipping*, Houston, TX, November 2002.
- 39) "FORM Inverse FORM and Code Calibration", *Atomic Energy Regulatory Board*, Mumbai, India, August 2002.
- 40) "Selecting Target Reliabilities in Probability-Based Design", *Bhabha Atomic Research Center*, Mumbai, India, August 2002.
- 41) "Extreme Value Theory in Civil Engineering", *Indian Institute of Science*, Bangalore, August 2002
- 42) "The role of random nanoscale fluctuations in material damage growth and failure", *Oak Ridge National Laboratory*, Oak Ridge, TN, July 2002.
- 43) "Issues in Probability-based Design", *Bengal Engineering College*, India, August 2001.
- 44) "Stochastic CDM and Random Structural Damage Growth", *Rensselaer Polytechnic Institute*, Troy, NY, March 2000.
- 45) "Developing Target Reliability for Novel Structures: The Case of the Mobile Offshore Base", *Rice University*, Houston, TX, February 2000.
- 46) "Stochastic CDM and Random Fatigue Crack Initiation", *Stanford University*, Stanford, CA, January 1999

PROFESSIONAL RECOGNITION

- **Member**, 2013 – present
International Scientific Committee, International Conference on Structural Safety and Reliability, New York 2013, Vienna 2017
- **Visiting Faculty**, June 2012 – May 2013
Department of Civil Engineering, Johns Hopkins University, Baltimore, MD, USA
- **Speaker, 2012 Indo-American Frontiers of Engineering Symposium**
National Academy of Engineering, Washington, DC, March 2012
- **Member**, 2012 - 2016
BRNS Expert Committee on Uncertainty & Sensitivity Analysis in Engineering & Environmental Systems
- **Associate Editor**, 2010- present
ASCE Journal of Bridge Engineering
- **Adjunct Professor**, January 2010 – present
Department of Civil and Environmental Engg., University of Delaware, Newark, DE, USA
- **Special Invitee**, 2010
National Disaster Management Authority of India, Committee of Experts on Vulnerability Analysis and Risk Assessment, New Delhi
- **Visiting Assistant Professor** Autumn 2005
Department of Civil and Environmental Engineering, Stanford University, Stanford, CA, USA
- **Member** May 2016 – present

- *ASCE Nanomechanics and Micromechanics Committee*
- **Member** June 2002 – present
ASCE Probabilistic Methods Committee
- **Control Member**, October 2001 – present
ASCE Fatigue & Fracture Reliability Committee
- **Member**, 2004 – present
International Association for Structural Safety and Reliability (IASSAR), Subcommittee on Structural Reliability and Optimization (SC3)
- **Member**, 2006 -2009
International Ship and Offshore Structures Congress, Committee I on “Loads”
- **Member** 2004 -2006
International Ship and Offshore Structures Congress, Committee VI.2 on “Very Large Floating Structures”
- **Member** *Standards and Criteria Working Group*, Mobile Offshore Base Program, Office of Naval Research, Washington, DC, USA, 1998 – 99

PROFESSIONAL SERVICE

- Chairman, Civil Construction and Maintenance Section, IIT Kharagpur. October 2013 – present
- In-charge, Structural Engineering Section, Dept. of Civil Engineering, IIT Kharagpur, Autumn 2013
- Asst. Warden, B. C. Roy Hall, IIT Kharagpur, 2007 – 2009
- Faculty Advisor, Civil Engineering BTech and Dual Degree students, IIT Kharagpur, 2009-2013
- Advisor, Civil Engineering Society, IIT Kharagpur, 2008-09
- Member Accreditation Board of Engineering Teaching (ABET) Committee, Department of Civil and Environmental Engineering, University of Delaware, 2001 – 2005
- Faculty Advisor ASCE Students Chapter, University of Delaware, 2001 – 2005
